

## ● Cherry REGINA

**Tree:** medium vigour, standard habit, auto-sterile, medium productivity.

**Blossoming time:** very late bloom. Self-sterile.

**Fruits:** large sized, heart-shaped, deep red spotted skin background colour. Flesh has an excellent taste and very firm texture. This variety is less susceptible to Monilia, it also has a good productive behavior on dwarfing rootstocks.

**Harvesting season:** late; 30 days post B.Burlat.

**Recommended pollenisers:** Carmen<sup>◇</sup>, Ferrovia, Kordia.
