

● Strawberry **APRICA***

Plant: high chilling requirement, suitable to European continental environments. Rustic plant, high resistance to diseases, particularly to oidium. Upright habit, with flowers below foliage. Very high productivity.

Fruits: very attractive, conical and regular shape. Fruit size is consistently large during all harvesting season.

Excellent firmness and very good shelf life. Bright and homogeneous colour even with low temperatures. Excellent resistance to rain. Good taste with a pleasant balance between sweetness and acidity.

Plant structure and blooming make picking very easy.

Harvesting time: + 4 days Clery*.
