

● Strawberry **CAPRI***

EVERBEARING

Plant: everbearing variety having medium vigor, with medium-dense foliage and excellent tolerance to the most common fungal diseases; moderately susceptible to leaf spot, resistant to oidium. Very high productivity.

Flowers: rich in pollen, easy-pollination, on upright stems.

Blossoming time: early, very long and regular.

Fruits: conical shape, very regular and attractive, uniform and large caliber, with slightly sunken achenes and medium sized calyx.

Skin is highly resistant with vivid red colour, very bright and uniform. Homogeneous red pulp, very firm texture. Flavour is excellent, high sugar content and good aroma. High fruits firmness and good colour stability often allow weekly harvests.

Plant structure makes harvesting much easy. Excellent storage and shelf life.

Harvesting time: early, very long and regular.
