

● Strawberry **CANTUS**[®] CIVRH621*

Plant: everbearer with high chill requirement. High-medium vigor. Foliage of intermediate density. Semi-upright habit. Rustic plant with a good tolerance to leaf and root diseases, very good tolerance to mildew and to oidium. Robust and efficient root system, also suited for organic production. Very high productivity. The picking season is high in the starting period but still is long and constant through the season. Very suitable for organic cultivation.

Fruits: Conical/hearted shape. The size is optimal and constant through the picking season. The color is bright red, very attractive and uniform, even when the berries are fully ripe. Flesh color is red and uniform.

Excellent skin resistance, very good shelf life also with hot summers.

Very pleasant organoleptic characteristics, ideal balance between sweetness and light acidic tones, good brix level.

Intense and persistent strawberry aroma.

Picking is easy and fast. Highly resistant on the plant and can be harvested when fully ripe. Excellent shelf life.

Harvesting time: early-season and long lasting.

* Patented variety, propagation prohibited
