

● Strawberry LYCIA*

Plant: single-crop, high chilling requirement. Medium vigour, semi-erect growth. Well suited to growing in both tunnel and open field. Rustic plant, tolerant to mildew and root diseases. High productivity. In suitable growing conditions the plant may blossom twice.

Fruits: size greater than Clery*. Slightly elongated, very regularly shape. Skin highly resistant to handling, excellent shelf-life. Easy harvesting. Highly intense flavour, highly aromatic, very sweet, low perceived acidity.

Harvesting time: intermediate between Clery* and Aprica*.
