

● Strawberry LAETITIA*

Plant: late season variety, with high chill requirement. Rustic plant with good tolerance to both radical and foliar diseases. The plant has a semi-erect habit with intense foliage of a deep green colour. Very high yields.

Flowers: medium size flower located slightly below the foliage, very rich in pollen.

Blossoming time: late and prolonged.

Fruits: regular rounded wedge-shaped, bright scarlet fruit, very attractive. Small sized calyx. Medium-large sized fruits.

Firm, sweet pulp, exceptionally aromatic and excellent keeping quality even at high temperature.

Harvesting time: + 12 days Clery*.
