

● Strawberry **QUICKY**[®] CIVN251*

LOFTY[®] CIVN260*

QUICKY[®] CIVN251*

Plant: high chilling requirement. Erected leaves, of large dimensions. Fruits are under the foliage and easy to harvest. High resistance against powdery mildew and leaf/root diseases. Good productivity.

Fruits: fruit of elongated and flattened, truncated conical shape. Medium-big caliber, regular throughout the entire harvest period. Quick pollination with satisfying resistance to misshapening and to low temperatures. Good resistance against rain and botrytis. Bright red colour even at high temperatures. Good firmness and flavor with a considerable brix level. Excellent resistance to fruit ripening in the plant. Possible to harvest every 5-7 days.

Harvesting time: very early, - 5 days Clery*.

The variety has a very strong second bloom with 3/5 flower stems.

Brix: 8,4°

LOFTY[®] CIVN260*

Plant: high chilling requirement. Erected leaves, of large dimensions. Well visible fruits, easy to harvest. High resistance against powdery mildew and leaf/root diseases. Good and high yield.

Fruits: regular fruit, conical shape, bigger size than Clery*, and until the final stage of harvest. Pollination is easy; no significant effect on the occurrence of fruit malformation.

Excellent resistance to rain and powdery mildew. Bright red colour even at high temperatures. Optimal firmness, even superior to Clery* and very aromatic flavor with a higher brix level than Clery*. Possible to harvest every 5-7 days.

Harvesting time: very early, - 5 days Clery*.

The variety has a very strong second bloom with 3/5 flower stems.

Brix: 8,8°
