

● Apple RENÈ® CIVREN^(PBR)

Tree: scab resistant variety. Moderate vigour with open habit and good productivity. The tree bears good fruit on two-year-old branches, it is self-thinning and naturally keeps one or two fruits per cluster. Mildly susceptible to powdery mildew.

Fruit: large size with a round, slightly flattened regular shape. Yellowish-green ground colour, covered with russeting over 50-60% of the surface. The part of the fruit exposed to the sun may take on a light red hue. The flesh is yellow, firm and juicy. High levels of humidity are recommended during storage.

Harvest time: 15 days before Golden Delicious cl.B.
