

## ● Pear **ABATE FETEL**

**Tree:** variety with upright habit and medium-low vigour.

Good direct grafting and intergraft compatibility with quince.

Bears fruit early, with constant productivity if properly pruned.

Bears fruit mainly on spurs and two-year-old branches.

**Fruit:** large size, long and slender in shape.

Yellow-green skin with rust-coloured areas of varying size and red blushing in the areas most exposed to the sun.

Fine, white, juicy, aromatic pulp with an excellent flavour.

**Picking season:** 25 days after Williams B.C.
