

● Strawberry CIVH725* (KLODIA**)

Plant:

- June bearing variety with high chill requirement;
- Medium vigour, with semi-upright habit. It is suitable both for tunnel and open field cultivation;
- Clearly visible fruit, easy to pick;
- Rustic plant, tolerant to the most common leaf and root diseases;
- Very high productivity, progressive and consistent during all the picking season;
- The plant shows an important second blossoming.

Fruit:

- Conical shape, regular during all the picking season;
- Red bright colour, uniform on all the fruit surface;
- Skin with a very good resistance to handling, remarkable shelf-life;
- Very good flavour, sweet and slightly aromatic;
- Big and consistent fruit size.

Harvest:

- + 1 day Clery_{pbr.}

* Advanced selection in process to be patented by Consorzio Italiano Vivaisti (C.I.V.)
